[DOCUMENT No. 11 — 1962.]

ANNUAL REPORT  
OF THE  
FIRE DEPARTMENT  
FOR THE YEAR 1961.

Boston, February 1, 1962.

HON. JOHN F. COLLINS,  
*Mayor of Boston.*

DEAR SIR:

I have the honor to submit herewith a report of the activities of the Boston Fire Department for the year ending December 31, 1961.

During the period covered by this document Mr. Henry A. Scagnoli was Fire Commissioner from January 1, 1961, to July 12, 1961. I was appointed to the office of Fire Commissioner on July 13, 1961.

Respectfully submitted,

THOMAS J. GRIFFIN,  
*Fire Commissioner.*

## SPECIAL COMMENTS

*1. Fires*

During 1961 there were 1,994 fires in buildings. The foregoing is a decrease from the number of building fires which occurred in 1960.

*2. Fire Prevention*

During the year 1961 the department was awarded a plaque by the National Fire Protection Association for placing first in the Commonwealth of Massachusetts, third among municipalities of over 500,000 in the United States, and fifth among all cities in the nation in a National Fire Prevention Contest held during the year 1960. This, of course, means that we are at the top among cities of the United States in fire prevention activities.

The intense campaign to educate the public in the use of space heaters has been continued. Only one death has been recorded from fires caused by space heaters during the year 1961. During 1959 twelve deaths were caused by defective space heaters, and in 1960 two persons died from this cause.

A microfilm photographic unit was installed in the Fire Prevention Division during the year, reducing the space required for the keeping of thousands of inspection reports and other records.

*3. Building Plans*

With the cooperation of the Building Commissioner, the Fire Department has been examining all plans for alterations in existing buildings and for new building construction in the city to insure compliance with all fire regulations prior to the issuance of a building permit by the Building Department. During the year 1961 the Fire Prevention Division has examined and approved, or disapproved, approximately 1,000 plans which were submitted by architects and engineers prior to the issuance of a building permit. As a result of the examination of building plans, it is felt that buildings being altered or erected in the City of Boston will be much safer from a fire prevention point of view than was previously the case. Many recommendations were made bearing on fire safety such as the installation of automatic sprinklers, heat detectors, local fire alarm systems in buildings of hazardous occupancy, dormitories, schools, nursing homes, and hospitals.

#### *4. Fire Stations Abandoned*

On July 1, 1961, the following fire stations were vacated by the Fire Department, and the companies quartered therein were relocated, with the exception of Engine Company 27, which was deactivated:

Engine Squad 11, Ladder Company 21 — 761 Saratoga Street, East Boston.

Engine Company 27, Ladder Company 9 — 333 Main Street, Charlestown.

Engine Company 43, Ladder Company 20 — 5 Boston Street, South Boston.

Engine Squad 11 was transferred to the quarters of Engine Company 5 at 360 Saratoga Street, while Ladder Company 21 was housed with Engine Company 56 at 1 Ashley Street.

Ladder Company 9 was relocated in the quarters of Engine Company 32 at 440 Bunker Hill Street, Charlestown, while Engine Company 43 and Ladder Company 20 were relocated in the fire station at 900 Massachusetts Avenue.

The foregoing relocations are in line with the consolidation program of the department and will result in the saving of several thousand dollars annually. The relocation of fire fighters and apparatus has not impaired the operating efficiency of the department, and maximum protection is still afforded to the sections of the city in which the changes were made.

#### *5. Training Activities*

During the year all officers and members of the Fire Department were given advanced training in fire-fighting operations at the Fire Academy on Moon Island. Over 2,700 members of the Boston Police Department also received instructions in fire prevention and the protection of life and property against the scourge of fire. Key personnel in hospitals, schools, United States Coast Guard, Boston Naval Shipyard, oil companies, industrial plants, and many others received instructions in basic fire safety and fire fighting at the academy.

#### *6. Fire Apparatus*

Contracts were awarded in November of 1961 for the furnishing of ten pumping engines, four 100-foot aerial ladder trucks, and two 85-foot aerial ladder trucks to replace old and obsolete equipment. This apparatus when placed in service will increase our operating efficiency at fires and other emergencies.
